Volume 26 Number 1 23 January 2004

RESEARCH REPORTS

Constraints experienced by beginning secondary science teachers in implementing scientific inquiry lessons
Gillian H. Roehrig and Julie A. Luft 3

Students' discussions in practical scientific inquiries
J. Rod Watson, Julian R.L. Swain and Cam McRobbie 25

Providing high school chemistry students with opportunities to develop learning skills in an inquiry-type laboratory: a case study
Avi Hofstein, Relly Shore and Mira Kipnis 47

Relationships between selective cognitive variables and students' ability to solve chemistry problems
Saouma BouJaoude, Sara Salloum and Fouad Abd-El-Khalick 63

Making pupils' conceptions of electricity more durable by means of situated metacognition
Petros Georghiades 85

Student understanding of the nature of science and their problem-solving strategies
Huann-Shyang Lin, Houn-Lin Chiu and Ching-Yang Chou 101

Why teach science? Graduate science students' perceived motivations for choosing teaching as a career in Taiwan
Hsiou-Huai Wang 113

Volume 26 Number 2 6 February 2004

RESEARCH REPORTS

Using a Science Writing Heuristic to enhance learning outcomes from laboratory activities in seventh-grade science: quantitative and qualitative aspects
Brian Hand, Carolyn W. Wallace and Eun-Mi Yang 131

The power and benefits of concept mapping: measuring use, helpfulness, ease of use and satisfaction
Lee A. Freeman and Leonard M. Jessup 151

Windows into practice: constructing effective science teaching and learning in a school change initiative
Russell Tytler, Bruce Waldrip and Michele Griffiths 171

Traits, genes, particles and information: re-visiting students' understandings of genetics
Jenny Lewis and Ulrich Kattmann 195

K-8th grade Korean students' conceptions of 'changes of state' and 'conditions for changes of state'
Seoung-Hay Paik, Hyc-Nam Kim, Boo-Kyoung Cho and Jae-Won Park 207

Building up explanations in physics teaching
Anna Maria Pessoa de Carvalho 225

Information presentation and troubleshooting in electrical circuits
Liesbeth Kester, Paul A. Kirschner and Jeroen J.G. van Merriënboer 239

Volume 26 Number 3 27 February 2004

RESEARCH REPORTS

Differential effects of science attitudes and science achievement in Australia, Cyprus, and the USA
Elena C. Papanastasiou and Michalinos Zembylas 259

Promoting emotional literacy, equity and interest in science lessons for 11–14 year olds: the 'Improving Science and Emotional Development' project
Brian Matthews 281

Effect of a long-term in-service training program on teachers' beliefs about the role of experiments in physics education
Jari Lavonen, Johanna Jauhiainen, Ismo T. Koponen and Kaarle Kurki-Suonio 309

Beliefs and knowledge in chemistry teacher development
William R. Veal 329

Moving to senior school: an under-exploited opportunity to teach nutrition?
Kathryn Bullen and David Benton 353

From the general to the situated: three decades of metacognition
Petros Georghiades 365

Volume 26 Number 4 19 March 2004

RESEARCH REPORTS

Student conceptualisations of the nature of science in response to a socioscientific issue
Troy D. Sadler, F. William Chambers and Dana L. Zeidler 387

Reconceptualizing the teaching of controversial issues
Chris Oulton, Justin Dillon and Marcus M. Grace 411

How can we identify replies that accurately reflect students' knowledge? A methodological proposal
N. Marín, E. Jiménez Gómez and A. Benarroch 425

Teaching for understanding and/or teaching for the examination in high school physics
David R. Geelan, Helen Wildy, William Louden and John Wallace 447

Research-based teaching unit on the tides
Jouni Viiri and Heikki Saari 463

Out-of-school experiences in science classes: problems, issues and challenges in Botswana
Anthony T. Koosimile 483

The learning processes of two high-school biology students when reading primary literature
Gilat Brill, Hedda Falk and Anat Yarden 497

Volume 26 Number 5 16 April 2004

SPECIAL ISSUE
Teaching–Learning sequences: aims and tools for science education research
Guest Editors: Martine Méheut and Dimitris Psillos

Editorial—Teaching–learning sequences: aims and tools for science education research
Martine Méheut and Dimitris Psillos 515

Didactical structures as an outcome of research on teaching–learning sequences?
Piet Lijnse and Kees Klaassen 537

An epistemiological analysis of the evolution of didactical activities in teaching–learning sequences: the case of fluids
Dimitris Psillos, Vassilis Tselfes and Petros Kariotoglou 555

Learning hypotheses and an associated tool to design and to analyse teaching–learning sequences
Christian Buty, Andrée Tiberghien and Jean-François Le Maréchal 579

Designing and validating two teaching–learning sequences about particle models
Martine Méheut 605

The teaching experiment as a powerful method to develop and evaluate teaching and learning sequences in the domain of non-linear systems
Michael Komorek and Reinders Duit 619

The design and evaluation of a teaching–learning sequence addressing the solubility concept with Turkish secondary school students
Filiz Kabapinar, John Leach and Phil Scott 635

Volume 26 Number 6 14 May 2004

RESEARCH REPORTS

Single-sex teaching and achievement in science
W.P.Robinson and E. Gillibrand 659

Talk and learning in classroom science
Lyn Dawes 677

How primary school students understand mains electricity and its distribution
Vassiliki Pilatou and Heleni Stravidou 697

Tough acts to follow: the challenges to science teachers presented by biotechnological progress
Tom Bryce and Donald Gray 717

How some college students represent their understandings of the nature of scientific theories
Zoubedia R. Dagher, Nancy W. Brickhouse, Harry Shipman and William J. Letts 735

Probing scientists' beliefs: how open-minded are modern scientists?
Richard K. Coll and Neil Taylor 757

Book Review 779

Volume 26 Number 7 4 June 2004

RESEARCH REPORTS

Development of school students' constructions of biology and physics
Katie Spall, Martin Stanistreet, Dominic Dickson and Edward Boyes 787

Investigating the 'failure of further learning' effect in preservice science teacher education
Peter F.W. Preece, Keith C. Postlethwaite, Nigel C. Skinner and Keith A. SImpson 805

Designing a web-based design curriculum for middle school science: the WISE 'Houses in the Desert' project
Alex J. Cuthbert and James D. Slotta 821

An analysis of the understanding of geological time by students at secondary and post-secondary level
Antonio J. Hidalgo and José Otero 845

Student-generated assignments about electrical circuits in a computer simulation
Cornelise Vreman-de Olde and Ton de Jong 859

Science textbooks for lower secondary schools in Brunei: issues of gender equity
Ann G. Elgar 875

Situational interest and the attitudes towards science of primary teacher students
David Palmer 895

Book Review 909

Volume 26 Number 8 25 June 2004

RESEARCH REPORTS

Shaping school science: competing discourses in an inquiry-based elementary program
Patricia M. Rowell and Margaretha Ebbers 915

Cooperating in constructing knowledge: case studies from chemistry and citizenship
Rejane Barbosa, Zélia Jólfili and Mike Watts 935

A model-based approach to science exhibition evaluation: a case study in a Brazilian astronomy museum
Douglas Falcão, Dominique Colinvaux, Sonia Krapas, Glória Querioz, Fátima Alves, Sibele Cazelli, Maria Esther Valente and Guaracira Gouvea 951

Pursuit of explanation within a computer-supported classroom
Kai Hakkarainen 979

What factors does friction depend on? A socio-cognitive teaching intervention with young children
Konstantinos Ravanis and Dimitris Koliopoulos 997

A smooth trajectory: developing continuity and progression between primary and secondary science education through a jointly-planned projectiles project
Dan Davies and Kendra McMahon 1009

Students as 'catalysts' in the classroom: the impact of co-teaching between science student teachers and primary classroom teachers on children's enjoyment and learning of science
Colette Murphy, Jim Beggs, Karen Carlisle and Julian Greenwood 1023

Book Review 1037

Volume 26 Number 9 16 July 2004

RESEARCH REPORTS

Improving the usefulness of concept maps as a research tool for science education
Els Van Zele, Josaphina Lenaerts and Willem Wieme 1043

A case study analysing the process of analogy-based learning in a teaching unit about simple electrical circuits
Roland Paatz, James Ryder, Hannelore Schwedes and Philip Scott 1065

Using models at the mesoscopic scale in teaching physics: two experimental interventions in solid friction and fluid statistics
Ugo Besson and Laurence Viennot 1083

Portuguese primary school children's conceptions about digestion: identification of learning obstacles
Graça S. Carvalho, Rui Silva, Nelson Lima, Educarda Coquet and Pierre Clément 1111

Assessing the quality of undergraduate education students' writing about learning and teaching science
Isobel J. Robertson 1131

Logical positivism as a tool to analyse the problem of chemistry's lack of relevance in secondary school chemical education
Joke Van Aalsvoort 1151

Volume 26 Number 10 20 August 2004

RESEARCH REPORTS

Developing understanding of image formation by lenses through collaborative learning mediated by multimedia computer-assisted learning programs
Ping-Kee Tao 1171

Design experiments in Japanese elementary science education with computer support for collaborative learning: hypothesis testing and collaborative construction
Jun Oshima, Ritsuko Oshima, Isao Murayama, Shigenori Inagaki, Makiko Takenaka, Hayashi Nakayama and Etsuji Yamaguchi 1199

The difficult relationship between theory and practice in an in-service course for science teachers
Ana Rivero García and Rafael Porlán Ariza 1223

Can teachers learn through enquiry on-line? Studying professional development in science delivered on-line and on-campus
Wynne Harlen and Susan J. Doubler 1247

Perceived professional needs of Korean science teachers majoring in chemical education and their preferences for online and on-site training
Taehee Noh, Jeongho Cha, Sukjin Kang and Lawrence C. Scharmann 1269

Book Review 1291

Volume 26 Number 11 17 September 2004

RESEARCH REPORTS

Theory building and modelling in a sinking and floating unit: a case study of third and fourth grade students' developing epistemologies of science
Keiko Kawasaki, Leslie Rupert Herrenkohl and Sherry A. Yeary 1299

Relationships between everyday knowledge and scientific knowledge: understanding how matter changes
Miguel Ángel Gómez Crespo and Juan Ignacio Pozo 1325

Exploring high school students' use of theory and evidence in an everyday context: the role of scientific thinking in environmental science decision-making
Fang-Ying Yang 1345

The impact of three dimensional computational modelling on student understanding of astronomy concepts: a quantitative analysis
John A. Hansen, Michael Barnett, James G. MaKinster and Thomas Keating 1365

Supporting prospective teachers' conceptions of modelling in science
Barbara A. Crawford and Michael J. Cullin 1379

Community leaders' views of the purposes of science in the compulsory years of schooling
David Symington and Russell Tytler 1403

Book Review 1419

Volume 26 Number 12 8 October 2004

RESEARCH REPORTS

Conscious knowledge of learning: accessing learning strategies in a final year high school biology class
Lindsey Conner and Richard Gunstone 1427

Exploring the use of concept chains to structure teacher trainees' understanding of science
Janet Machin, Janet Varley and Peter Loxley 1445

Evaluating students' science notebooks as an assessment tool
Maria A. Ruiz-Primo, Min Li, Carlos Ayala and Richard J. Shavelson 1477

Science teachers as metascientists: an inductive–deductive dialectic immersion in northern alpine field ecology
Larry Bencze and Leo Elshof 1507

Views of elementary and middle school Turkish students towards environmental issues
Ozgul Yilmaz, William J. Boone and Hans O. Andersen 1527

Book Review 1547

Volume 26 Number 13 29 October 2004

RESEARCH REPORTS

The impact of three-dimensional computational modelling on student understanding of astronomy concepts: a qualitative analysis
John A. Hansen, Michael Barnett, James G. MaKinster and Thomas Keating 1555

Analysing cognitive or non-cognitive factors involved in the process of physics problem-solving in an everyday context
Jongwon Park and Limook Lee 1577

An investigation of tertiary students' understanding of evaporation, condensation and vapour pressure
Hemant Gopal, Jacques Kleinsmidt, Jennifer Case and Paul Musonge 1597

Socio-scientific controversies and students' conceptions about scientists
Pedro Reis and Cecília Galvão 1621

Activity theory as a tool to address the problem of chemistry's lack of relevance in secondary school chemical education
Joke Van Aalsvoort and O.S.G. Huygenwaard 1635

Learning by doing? Prospective elementary teachers' developing understandings of scientific inquiry and science teaching and learning
Leigh Ann Haefner and Carla Zemba-Saul 1653

Book Review 1675

Volume 26 Number 14 19 November 2004

RESEARCH REPORTS

Students' conceptions of fluids
Ugo Besson 1683

Reasoning Maps: a generally applicable method for characterizing hypothesis-testing behaviour
Brian White 1715

Conceptions of learning science among high school students in Taiwan: a phenomenographic analysis
Chin-Chung Tsai 1733

Science and citizenship education
Ian Davies 1751

Genetically modified food in perspective: an inquiry-based curriculum to help middle school students make sense of tradeoffs
Sherry Seethaler and Marcia Linn 1765

Primary teachers' changing attitudes and cognition during a two-year science in-service programme and their effect on pupils
Tina Jarvis and Anthony Pell 1787

Book Review 1813

Volume 26 Number 15 17 December 2004

RESEARCH REPORTS

The symbiotic roles of empirical experimentation and thought experimentation in the learning of physics
Miriam Reiner and John K. Gilbert 1819

University student approaches to learning science through writing
Robert A. Ellis 1835

Helping young children to see what is relevant and why: supporting cognitive change in earth science using analogy
Anthony Blake 1855

Tutoring through the internet: how students and teachers interact to construct meaning
Marcelo Giordan 1875

Book Review 1895

Contents of Volume 26, 2004 1899
